AMENDMENT OF SOLICITATION/MODIFICATION OF CONTRACT
(continued)

The purpose of this modification is to require, pursuant to the "Changes" clause, additional effort in support of the Integrated Enterprise Management System (IEMP). Specifically, the contractor will provide support for the Human Capital Information Environment; the Plant, Property, and Equipment; and the eTravel System modules. Accordingly, NNM04AA02C is modified as follows:

- A. Attachment J-1, Performance Work Statement (PWS), Section 4, is revised to direct the contractor, pursuant to the "Changes" clause, to provide effort in support of the Human Capital Information Environment; the Plant, Property, and Equipment; and the eTravel System modules, through May 16, 2007, only.
- B. In accordance with NFS 1843.7003, it is mutually agreed and understood that the immediate contract modification for the effort delineated in (A) above covers only the period of November 17, 2006, through May 16, 2007, and that a not-to-exceed (NTE) (cost only) for performance of the work covered by this change in the amount of \$8,794,017 is hereby established. It is further agreed and understood that any costs ultimately definitized over and above the NTE amount established for the period covered by this change shall be non-fee bearing. Upon definitization of the contractor's proposal(s) submitted as a result of this modification, continued performance of the effort from May 17, 2007, through December 31, 2008, will be authorized. Further, it is agreed that a not-to-exceed (NTE) (cost only) for performance of the entire effort through December 31, 2008, in the amount of \$20,227,459 is hereby established. It is further agreed and understood that any costs ultimately definitized over and above the NTE amount established for the entire period covered by this change shall be non-fee bearing.
- C. SAIC proposal SAIC-P-024 dated November 13, 2006, and submitted in response to NASA/MSFC letter Request for Proposal PS31-AA02C-06-223 dated October 5, 2006, was prepared in accordance with FAR Subpart 15.4, Table 15-2 (in the format prescribed for "Change Orders, Modifications, and Claims"). In preparing the proposal, the contractor included costs through December 31, 2007. No deviations from the requirements stated therein were accepted by the Government. It is understood that this proposal was utilized in establishing the amount delineated as the NTE for the period November 17, 2006, through May 16, 2007, and will

subsequently be utilized as the basis for the equitable adjustment for the time period November 17, 2006, through December 31, 2007.

- D. SAIC shall also submit a separate proposal for the costs associated with performance of the effort delineated in (A) above for the period January 1, 2008, through December 31, 2008. The proposal submitted in response to the change delineated in (A) above shall be prepared in accordance with FAR Subpart 15.4, Table 15-2 (in the format prescribed for "Change Orders, Modifications, and Claims"). No deviations from the requirements stated therein will be accepted by the Government without the express written approval of the UNITEs Contracting Officer. The proposal shall be submitted no later than December 21, 2006. Upon definitization of the contractor's proposal submitted as a result of this modification request, continued performance of the effort from January 1, 2008, through December 31, 2008, will be authorized (contingent upon exercise of Option Period 2).
- E. This contract change shall be separately accounted for to the degree necessary to provide visibility into the actual costs incurred pending definitization of the proposal(s) submitted prior to this contract action or to be submitted in accordance with "D" above.
- F. The modification(s) made above are reflected in total on the change page(s) enclosed herewith. In order to reflect the change(s) made, the page(s) listed below are hereby deleted from, or added to, NNM04AA02C. Either bolded text or a vertical change bar included in the right margin indicates the specific area(s) of change.

4. **IEMP INTEGRATION SERVICES**

The contractor shall be responsible for executing all functions and services defined below in support of the roles and responsibilities assigned to the Integrated Enterprise Management Program (IEMP) Integration Project Office (IPO) at MSFC. These functions and services are categorized in three major areas: infrastructure support, module project support, and operations and sustaining support. These functions and services include operation/ maintenance of existing capabilities, integration with established business entities (e.g., WebTADS), development or acquisition (e.g., **Human Capital Information Environment; Plant, Property, and Equipment; and eTravel System, only through May 16, 2007, for these modules**), and implementation of enhancements or COTS products.

Effective November 15, 2005, the work described in Section 3.1.4, Web Time and Attendance Distribution System (WebTADS), shall be performed under this section.

4.1 **INFRASTRUCTURE SUPPORT**

The contractor shall be responsible for developing, documenting and maintaining an Enterprise Architecture for IEMP. The contractor shall provide a methodology and tool set for the documentation and maintenance of this enterprise architecture. The contractor may elect to utilize the existing IPO tool set for architecture documentation or propose their own tool(s) and methodology. The Enterprise Architecture shall consist of the IEMP Business, Applications, and Technical Architectures (DRD 974MA-007).

4.1.1 **Business Architecture**

Through interaction with each module's NASA process team and each module project's implementation contractor, the contractor shall utilize an enterprise architecture tool to document the business processes implemented by the module (DRD 974MA-007). The business architecture shall include all modules (including those not yet initiated) and shall represent a blueprint of the interaction between the high-level functions and processes. The process models shall be incorporated and maintained in the IEMP repository. The contractor shall update these models as business processes are updated to insure that a central repository always contains accurate descriptions of the business processes implemented by the collective modules that make up the total IEM system. Different implementation contractors may be utilized for different module projects and each may utilize different implementation methodologies and tool sets; however the contractor shall maintain the central repository that documents all processes across all modules.

4.1.2 **Application Architecture**

Through interaction with each module's NASA process team and implementation contractor, the contractor shall utilize existing tools to further develop and maintain the Application Architecture (DRD 974MA-007) throughout the life of IEMP. The applications architecture shall include the key interfaces and information needs between modules, and a definition of how those interfaces will be implemented. The contractor shall insure that the Application Architecture facilitates the use of the IEM Integration Architecture by including standard events and messages (data) that are associated with each integration.
